

## Connection Instructions – Windows 7

Click the wireless icon by the time in the system tray.

You will see the Wireless Network Connections box. Click on WC\_Wireless, select Connect Automatically and click Connect.

*Note: If you have connected to this network before and selected Connect Automatically, you will not see the Connect Automatically option.*

Once your computer is connected to the WC\_Wireless network, you can close the control panel and open any web browser to access the internet and start the wireless registration.
